## **DETAILED ACTION**

### ***Election/Restrictions***

1. Claims 22-41 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species B, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 12/7/07.

### ***Information Disclosure Statement***

2. The information disclosure statement (IDS) filed on 3/9/07 has been considered by the examiner and is found to be cumulative to the art of record.

### ***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-11 and 13-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

If the claim as a whole does not apprise one of ordinary skill in the art of its scope, it does not serve the notice function required by 35 U.S.C. 112, 2<sup>nd</sup> paragraph, by providing clear warning to others as to what constitutes infringement of the patent. See, e.g., *Solomon v. Kimberly-Clark Corp.*, 216 F.3d 1372, 1379, 55 USPQ2d 1279, 1283 (Fed. Cir. 2000). In particular, Applicant claims "applying a 3-D operator to the convolutions" in the last lines of claim 1 and claim 13. The claims, as a whole, do not apprise one of ordinary skill in the art as to which 3-D operator applied to the

convolutions would constitute infringement of the patent. Therefore, it does not serve the notice function required by 35 U.S.C. 112, 2<sup>nd</sup> paragraph.

***Allowable Subject Matter***

5. Claims 12 and 21 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. The following is a statement of reasons for the indication of allowable subject matter: the prior art does not teach or make obvious the claimed three-dimensional migration operator.

Please see line 3 under INTRODUCTION of the Reshef et al. article (3D prediction of surface-related and interbed multiples, 2002) where it notes the difficulty of applying 3D algorithms directly to 3D data due to sparseness and irregularity of the acquired data.

***Conclusion***

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
